

Product Change Notice

E-Disk[®] SCSI New Firmware 3B26
PCN-MK-010-00
June 13, 2008

Overview

Effective immediately, all E-Disk[®] SCSI products will be shipping with a new standard firmware version 3B26 replacing the current version 3B24.

The following is a summary of changes and/or enhancements:

- Included support for new flash devices
- Added enhancements on wear leveling
- Enhanced SCSI bus reselection during Format Unit Command
- Improved monitoring of the E-Disk drive's write statistics

Affected Products:

3.5" E-Disk[®] SCSI
2.5" E-Disk[®] SCSI

Models D3S40, D3S20, D3S10, D3S5
Models D2S20, D2S10, D2S5

Recommendation:

Firmware version 3B26 is a recommended, but not mandatory, upgrade to E-Disk[®] SCSI products with firmware version 3B24 or lower.
